HONOR ROLL OF AMR BOOK REVIEWERS
REVIEWER INDEX FOR VOL 52 (1999)

Many thanks and deep appreciation are due to all the reviewers listed here for the time and effort they have put in to describe and critique books for the benefit of the engineering science community.

References to AMR (at the end of each entry) are coded in the form nRm, where n is an integer which gives the AMR issue number (1 for Jan, 2 for Feb, etc), R stands for Review, and m is the number of the review within the issue book review section. Under each reviewer's name the books are sorted alphabetically by title.

SUBJECT INDEX FOR VOLUME 52 (1999)

References to AMR (at the end of each entry) are coded in the form nLm, where n is an integer which gives the AMR issue number (1 for Jan, 2 for Feb, etc), L is a letter (R, N, A, or T), and m is the sequence number of the item within the issue. If L = R or N, the item is in the BOOK REVIEWS section with R indicating a signed Review and N a staff-prepared Note. If L = A or T, the item is in the REVIEW OF THE JOURNAL LITERATURE section with A indicating that an abstract is given and T that only the title of the article is given. Items are listed under each subject heading in the order in which they were originally published in AMR.
